Well-Appearing Infant 29-60 Days with Abnormal WBC Count or Bands

May Perform LP:

Infants with **abnormal blood work** were more likely to have IBI with temp > 38.5°C

High Risk [blood work and temp > 38.5]:

IBI: 14/184 (7.6%)

Meningitis: 4/184 (2.2%)

High Risk [blood work and temp 38.0-38.5]

IBI: 3/92 (3.3%)

Meningitis: 0/92

Temp alone (without abnormal blood work) was not associated with higher IBI risk

IBI: 1/255 (0.4%)

Meningitis: 0/255

Recommendations for this infant

- May perform LP
